Our companies are great in plastics automation.

WEMO operates internationally, specializing in **linear robotic systems** and automation applications for injection molding machines. Thanks to its years of experience, innovative developments and a high degree of quality awareness, it has become a leading global supplier for automation in the plastic industry. Our fascination of technology inspired our motto: **PASSION FOR AUTOMATION** www.wemogroup.com

Waldorf Technik, headquartered in Germany, has around 100 employees and specializes in the automation for injection molding processes with cycle times between 2-20 seconds and high number of cavities, **focused on medical and packaging applications**. Within the last 30 years, the company has become the market leader for pipettes and other medical applications. Waldorf Technik helps their customers to secure their success through experience, security and technical know-how. www.waldorf-technik.com

GeKu, also headquartered in Germany, has more than 20 years of experience and is specialized in the automation for injection molding processes and stand alone assembly systems. The company is focused on solutions for hybrid electronic parts, with wide **experience in automotive, electronics and consumer goods**. GeKu delivers automation systems (incl. insert loading) for electrical connectors to most of renowned automotive suppliers. Customer dedication is the key. www.geku.de
