

GET CONTROL ANYWHERE
- AT ANY MOMENT

CONNECT

Wemo Connect gives you full control over machines and robot cells – around the clock

Wemo Connect is a generous tool for you who want to keep up to date with what's happening in production. In addition to Connect being standard in Wemo's premium products xDesign, xLine, sDesign and xPacker, all Wemo robots from model 2023 include Wemo Connect 4.0. If you have robots and other equipment from other manufacturers, you can also connect them with Wemo Connect. In fact, you can even add the coffee machine if it's of a more modern design.

Access to all documentation

Once you have installed Wemo Connect, you get easy access to mechanical drawings, wiring diagrams and other documentation for the company's robots, conveyor belts, Smartdrives and other equipment. The documentation is available in the backend and can be opened, downloaded and printed as needed. Via Wemo Connect, you can also conveniently access the latest manuals and spare parts lists directly from the app.

The advantages with Wemo Connect:

- ✓ Reduces downtime
- ✓ Status for outcome, cycle time, etc
- ✓ Error alarm through push notifications
- ✓ Overview of different facilities

Let production continue **wherever you are**

Being physically present in front of each machine can sometimes seem like a mission impossible, especially if you are in a meeting, travelling or busy with other activities. The Wemo Connect concept allows you to connect online to the production process via your smartphone or tablet with just a simple click and the benefits for you as a user are many:

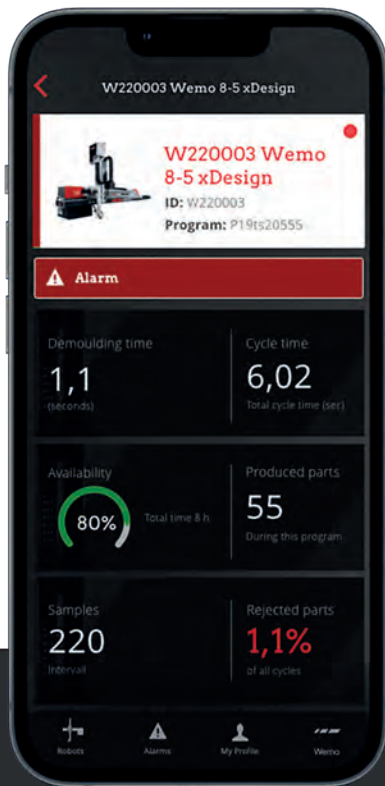

User value	Document	Connect	Availability
Price	Free	9 € / month*	19 € / month*
Documentation ¹	X	X	X
Access to the Wemo Connect app		X	X
Report service		X	X
Availability		X	X
Rejected parts		X	X
Operating time		X	X
Production status		X	X
Alarm history		X	X
Cycle time		X	X
Production overview ³		X	X
Preventive maintenance reminder		X	X
WRS			X

¹ Access to documentation even if Wemo Connect is terminated

² Only available on WIPS 4.0, requires option

³ Production overview is an option that costs 1210 EUR for the entire company (not per robot).

* 5% discount for 36 month subscription
10% discount for 60 month subscription
